CORE STACK

Governance

Informatica CDGC, EDC, Axon, Analyst; MIMB / MITI bridges

AI & LLM

Anthropic Claude API, Claude Code, MCP, agentic workflows, RAG, prompt engineering, LLM evaluation

Languages

Python, SQL, JavaScript / TypeScript, HTML / CSS, Bash

Data & BI

Oracle, Hive, Tableau, Power BI metadata, Snowflake

Security

Kerberos (krb5.conf, keytab), JVM args, SSL/TLS, Hadoop principal auth

Compliance

DAMA-DMBOK, UAE PDPL, NDMO Controls (P1 to P3), Abu Dhabi Digital Transformation Policy

CERTIFICATIONS

- CDMP Certified Data Management Professional, Associate
- DAMA Data Management Fundamentals, Practitioner
- Informatica Data Privacy Governance
- Data Governance & Privacy, Foundation
- Snowflake SPN: Sales and Technical Sales

LANGUAGES

English Fluent
Arabic Native

Senior Data Governance Engineer with 5 years across major GCC clients including Qatar Central Bank, Abu Dhabi Executive Office, Dubai Police, and DCT, specializing in Informatica CDGC, EDC, and Axon. Independently designed and shipped a public portfolio of **19 AI-powered tools** across four product suites, plus Manarah, an AI-native data management platform with an embedded LLM agent. Bilingual (Arabic and English), focused on regional problems: Arabic NLP, RTL localization, and GCC regulatory tooling.

EDUCATION

B.Sc. in Software Engineering · Al Ain University, UAE 2017 to 2021

EXPERIENCE

Senior Data Governance Engineer at BBI Consultancy 2021 to present · Dubai
Lead consultant on multi-year governance engagements for GCC government bodies and financial regulators.

Abu Dhabi Executive Office (ADEO), UAE Federal · 2021 to 2024

- Built ADEO's Data Governance capability from the ground up. Joined when no DG framework was in place, and over three years delivered a complete end-to-end Data Management lifecycle now operating in production: ETL, Data Quality, Cataloging, Governance, and Marketplace publishing, with DQ measures applied on live data.
- Architected the federal Data Marketplace, enabling secure data sharing across **30+ government entities** grouped into clusters by shared mandates and operational domains. Cross-entity data visibility improved by **60%**. Framework was aligned to the UAE National Data Strategy.
- Led a cross-functional team to deploy CDGC, cutting data access bottlenecks by **40%** and delivering 100% of contracted scope ahead of schedule.

Qatar Central Bank (QCB)

- Designed and delivered an integration between QCB's Tableau and Informatica Axon environments, allowing business and governance users to find reports through their underlying KPIs and associated glossary terms. Replaced a fragmented BI estate with a governed, navigable data landscape.

Dubai Police · Department of Culture & Tourism Abu Dhabi · SCAD

- Dubai Police: defined **200+ critical data elements** and integrated 10+ legacy databases into a unified catalog, contributing to a 30% reduction in manual data reconciliation.
- DCT: re-engineered the data governance operating model and delivered an enterprise-wide Axon and EDC training program to 50+ stakeholders, accelerating compliance with the Abu Dhabi Digital Transformation Policy.
- SCAD: optimized data quality controls, achieving 95% accuracy on statistical outputs and supporting GDPR-aligned data handling.

PROJECTS · 2025 TO 2026

Manarah Suite FLAGSHIP

AI-native, four-component alternative to the Informatica stack, with **UAE PDPL and regional data-law checks built directly into the ETL, DQ, and governance lifecycle** rather than handled as a separate compliance layer. Components: **Wasit** (ETL), **Mizan** (Data Quality), **Amin** (Data Governance), and **Manarah AI**, an LLM agent that runs the full data management lifecycle from a chat UI.

Public AI Tools Portfolio 19 TOOLS · 4 SUITES

BizIntel (7): Competitive Intel, Persona Studio, Meeting Distiller, Contract Lens, CSV Storyteller, Resume Match, Resume Forge.

DevKit (6): Schema Detective, Test Forge, SQL Whisperer, Doc Forge, Changelog AI, Git Narrator.

AI Lab (4): Prompt Bench, Prompt Shield (red-team for injection), Agent Builder, Arabic Bench.

ContentForge (2): Content Repurposer, AI Debate Arena.

UAE Legal Contract Analyzer & Localization CLIs

LLM contract reviewer that cross-references UAE federal and emirate law, flags gaps, and proposes corrected language. Plus two CLIs: one converts any LTR project into a fully functional RTL Arabic build; another transforms web projects into native mobile apps.
